Summary

Software Engineer with 4+ years building responsive, accessible, and high-performance web and mobile applications. Strong experience with React, Next.js, TypeScript, Node.js, and NestJS comfortable owning both frontend and backend. Built production systems with real-time WebSocket features, REST APIs, cloud storage pipelines, and 3D WebGL interfaces. Focused on clean architecture, maintainable code, and measurable improvements in user experience and reliability.

SKILLS

- **Frontend & Frameworks:** React.js, Next.js, React Native, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Ant Design
- **3D & Animation:** Three.js, WebGL, GLSL Shaders, Framer Motion, CSS Animations
- **State & Data:** Zustand, Redux Toolkit, TanStack Query (React Query), Context API, GraphQL, REST APIs, WebSockets
- **Tooling & Workflow:** Git, GitHub, Linux, CI/CD basics, Postman, Docker
- **Databases & Backend :** Node.js, Express.js, NestJS, Socket.io, JWT, Authentication & Authorization, Rate Limiting, Zod, Helmet, PostgreSQL, Prisma, Supabase, Cloudinary
- **Monitoring & Analytics :** Sentry, PostHog
- **UX / Professional Skills:** Responsive Design, Mobile-first Development, Accessibility (a11y), UI/UX integration, Performance optimization, Cross-team collaboration, Problem solving

PROJECTS

WorkNest Frontend

Technologies: Next.js, TypeScript, Tailwind CSS, Three.js, Socket.io, TanStack Query, Zustand.

Live Demo

GitHub

Summary: Built a full-stack collaborative project management platform featuring a 3D WebGL landing scene with custom GLSL shaders and scroll-driven animation (Three.js), real-time task boards with optimistic drag-and-drop updates and rollback on failure, live presence awareness showing who's viewing which task, @mention autocomplete in chat and comments, and a fully responsive mobile-first UI with drawer navigation. Integrated Sentry for frontend error monitoring and PostHog for product analytics.

WorkNest Backend

Technologies: Node.js, Express, TypeScript, Prisma, PostgreSQL, Socket.io, Supabase, Zod, JWT.

GitHub

Summary: Built a modular REST + WebSocket API with controller/service/schema architecture per domain. Features JWT authentication with brute-force protection via express-rate-limit, Zod schema validation on all routes, role-based authorization guards (owner vs member), real-time presence tracking with Socket.io including multi-tab deduplication, file upload pipeline to Supabase Storage with UUID renaming and safe deletion, @mention parsing scoped to project members only, and production hardening with Helmet, response compression, and Sentry error monitoring.

EXPERIENCE

- Mensa Philosophical Circle** **Jun 2026 – Sep 2026**
Fullstack Engineer Intern
 - Developed and integrated full-stack features across React/TypeScript applications and NestJS backend services, working with REST APIs, Prisma, MySQL, and React Query.
 - Built backend business logic for subscriptions, plan enforcement, role-based access, tenant-scoped data, payroll, tuition, financial reporting, class management, promotions, and syllabus validation.
 - Implemented backend APIs for bank-account verification and finance gating, payroll staff lookups, duplicate prevention, tuition data integrity, and comparative financial analytics.
 - Developed secure bulk-upload workflows for pupils and staff, including template validation, duplicate detection, school/tenant association, error reporting, and prevention of partially persisted records.
 - Improved frontend applications using React, TypeScript, React Query, Redux Toolkit, Zustand, React Hook Form, Zod, and Tailwind CSS, building dashboards, forms, data tables, filtering, modals, and financial reports.
 - Strengthened application reliability by implementing Playwright end-to-end smoke tests for authentication, dashboard navigation, and critical user workflows.
 - Improved code quality and maintainability through stronger TypeScript definitions, API error handling, dead-code removal, frontend/backend synchronization, and regression fixes.
- Ace Embedded Ltd** **Jul 2024 – Jan 2025**
Frontend Developer
 - Developed responsive, enterprise-grade UI components with React and Next.js, ensuring accessibility and cross-browser compatibility.
 - Integrated AI-powered realtime features using Socket.io to support multi-user sessions.
 - Optimized front-end workflows and resource loading to improve reliability under high traffic.
 - Collaborated closely with backend engineers to define robust API contracts and error handling.
 - Established Git workflows and PR practices that reduced merge conflicts and improved team velocity.
- Maziv Technologies Limited** **Aug 2023 – Oct 2024**
Frontend Developer
 - Built and deployed scalable React applications leveraging modern front-end frameworks and patterns.
 - Monitored application performance and resolved critical bugs to maintain platform stability.
 - Assisted in migrating legacy interfaces to modern component libraries, reducing maintenance burden.
 - Participated in cross-functional feature planning and code reviews.

- BOI-UAT-TECH HUB** **Feb 2022 – Dec 2022**
 Frontend Developer
 - Delivered responsive front-end solutions for enterprise-scale applications.
 - Performed code reviews and testing to improve production quality and reduce regressions.
 - Helped design scalable front-end architecture aligned with product requirements.
- Freelance** **Apr 2021 – Sep 2021**
 Frontend Developer
 - Designed and delivered custom websites and single-page applications from concept to deployment.
 - Converted UI/UX wireframes into production-ready interfaces and implemented SEO best practices.
 - Consistently delivered projects on schedule and achieved strong client satisfaction through clear communication and iteration.
- SideHustle** **Jan 2021 – Apr 2021**
 Frontend Developer Intern
 - Contributed to team projects in an Agile environment, participating in sprints and demos.
 - Supported debugging, testing, and feature implementation under senior developer guidance.
 - Gained exposure to industry-standard development workflows and presentation of work to stakeholders.

EDUCATION

- Bachelor of Science (B.s.)** **(2021-2025)**
Computer Science
 Grade: Second Class Upper Division
 University of Africa, Toru-Orua, Bayelsa State, Nigeria

CERTIFICATION

- Cloud Based Hacking (zsecurity)** Sept 2025
